6 Customize your page	23
Add "Extras" to your disc	24
7 Add a video clip and create a button	24
8 Trim and add scene/chapters to your video	25
9 Add a sub-menu	25
10 Create a Playlist	26
11 Build a Compilation	26
12 Check disc space used	27
13 Preview your menu	28
14 Burn your disc!	28

Chapter 3

Build a Menu Page 31

Creating a look and navigation for your page

Get to know the Workspace panel	32
Zoom in or out with view controls	32
Turn on the Panel Overlays	32
Edit or add text	34
Set your text's style, size and formatting	35
The Workspace Tool Set	36
The Selection Tool	36
The Sizing Tool	36
The Navigation Tool	36
Automatic Alignment, Sizing and Spacing Tools	37
Multiple element alignment tools	37
"Make Same Size" Tools	37
"Even Spacing" Tools	37
Individual element alignment tools	37

Add a graphic or animated video clip to your page	38
Add a menu button to your page	38
Apply a Theme to your menu page	38
Add a custom image background to your menu page	39
Add a custom video background to your menu page	40
Add a musical background to your menu page	41
Set the menu "loop" length for your background media	42
Set a Loop Point for your background video	43
Set your menu background to loop	45
Additional Menu Page Properties	45

Chapter 4

Create and Customize a Menu Button 47

Cool navigation

Add a video clip and create a button linking to it	48
Trim your video clip and add scene markers	49
Add a button linking to another menu page	49
Use optimized video formats for your disc's source	49
Make your button display as text only or image only	50
Set the thumbnail image for your button	51
Select a custom graphic or video as your button image	52
Make your button's image animated	52
Add a custom button frame	54
Edit text on your button	56
Position and size your button	56
Select a button highlight's shape and color	56
Color Sets	58
Modify your button navigation order	60
Set a button to Auto-Activate	61
Additional Button Properties	61

Chapter 5
