

What do you want to do?

Chapter 1

Get to know Vegas Movie Studio 10 5

What's what and what it does

The Vegas Movie Studio HD 10 interface	6
The Project Media window	7
The Explorer window	8
The Transitions window	9
The Video FX window	9
Media Generators	10
The Trimmer	10
The Preview window	11
The Timeline	11
Additional "Pop-up" windows	12
The Video FX dialog window	12
The Audio FX dialog window	12
The Plug-in Chooser	13
The Pan/Crop Motion dialog window	13
Customize your workspace	14
Resize the windows	14
Maximize/Minimize the windows	14
Undock the windows	14

Chapter 2

Start a New Project..... 23

Smart beginnings

The Welcome Screen	24
Start a new project	24
Select settings in the New Project dialog box	25
What is 24p?	26
Match Media Settings	27
Change Project Properties	28
Full Resolution Rendering Quality	28
Deinterlace Method	28
Set Project Properties default	29
Video, Audio and other Project Properties	29
Cut and paste between projects	29

Chapter 3
Get Media Into Your Project 31

Gathering your assets

Add media to your project	32
Titles and Media Generators	32
Capture video from a miniDV camcorder	33
Batch Capture your video	36
Capture video from an HDV camcorder	37
Capture video from an analog or non-DV source	39
Get video from an AVCHD or other hard drive camcorder	40
Import video from a DVD or DVD camcorder	42
Scan your photos with Vegas Movie Studio HD	43
Extract audio from a CD	46
Download video from the Web	47
Import media from your hard drive	48
Create specialized media with the Media Generator	48
Preset media clips and textures	49
Preset title templates	49
Customize generated media	49
Set a Generated Media clip's length	51
Save Generated Media changes	51
Re-edit a Generated Media clip	51
Add media from the Explorer window	52

Chapter 4
Order and Prep Your Clips in the Project Media Window 53

The catalog of your imported media

Get to know the Project Media window	54
Media clip views	54
Preview your Project Media clips in the Trimmer	54
Organize your clips in Media Bins	55
Media Offline warning	55
Remove All Unused Media	56
Locate a media clip on your hard drive	56
Stabilize your media clip	57
Pre-apply an effect to a "media" clip	58
Tools for working with still photos	59
Red-Eye Reduction	59
Rotate Clips	59
Remove a clip from your Project Media	60
Replace a clip in your Project Media	60
Recapture All Off-Line Media	60

Chapter 5
Prepare Your Media in the Trimmer Window . 61

Previewing and pre-setting your clips

Open a clip in the Trimmer	62
Trimmer history	63
Pre-trim a clip in the Trimmer	63
Launch the Trimmer with a double-click	63
Create a sub-clip	65
Add Audio Only or Video Only from Project Media	66
Add Audio Only or Video Only from the Trimmer	66
Trimmer view toggles	67
Show Video Monitor	67
Open Trimmer on External Monitor	67
Show Video Frames	67
Open audio in an audio editor	68

Chapter 6
Edit Video on the Timeline..... 69

Where your clips become a movie

Add media clips to your timeline	70
Preview your timeline	71
Arm a video or audio track	71
What to do if your timeline playback lugs	72
Trim an event clip on your timeline	72
Split an event clip on your timeline	73
The danger of over-extending an event clip	73
Create an Automatic	
Cross-Dissolve between events	74
Separate a clip's audio and video	74
Speed up or slow down an event clip	75
Play an event clip in reverse	75
Basic Timeline controls and views	76
Zoom in or out on your timeline	76
Scrub the timeline	76
Position the Timeline Cursor	
at a precise point on your timeline	76
Add a Fade In or Fade Out to a video event clip	77
Render and pre-render your video project	78
Selectively pre-render your video	78
Dynamic RAM Rendering	80
Render to a New Track	81
Render only one track of video to a new track	82

Chapter 7
More Timeline Tools 85

The deeper toolkit

Select segments of events on your timeline	86
Create a Loop Region	87
Select individual event clips on your timeline	87
Cut, Copy and Paste clips on the timeline	88
Paste Event Attributes	89
Cut, Copy and Paste between projects	89
Delete events from your timeline	90
Auto Ripple modes	90
Auto Ripple disabled	90
Auto Ripple/Affected Tracks	91
Auto Ripple/Affected Tracks, Markers and Regions	91
Auto Ripple/All Tracks, Markers and Regions	91
Post-Edit Ripple	92
Delete and Close Gap	92
Slip or Slide an event clip or cut/transition	93
Slip a clip	93
Slide a cut or transition	93
Group and Ungroup your events	94
Create a Group	94
Clear a Group	94
Remove individual events from a Group	95
Track headers	96
Add a video or audio track	97
Reorder your video and audio tracks	97
Remove a video or audio track	97
Rename a track	98
Resize your video and audio tracks	98
Use the Timeline Grid as a guide	99
Snap clips to the Grid	99
Add multiple Takes of a scene to your timeline	100
Edit with J-cuts, L-cuts and multiple tracks of video	102
Create a Picture-in-Picture or Brady Bunch effect	104
Parent and Composite your video tracks	106
Mask a composited video	106
Parenting video tracks	107
Blur a face, as on TV's COPS	108

Chapter 8
Work with Photos 113

Slideshows and motion paths

Project Media tools for working with photos	113
Optimize your photo sizes	114
Create a slideshow	114
Create a motion path over your photo	117
Lengthen or shorten your slideshow	119
Reduce Interlace Flicker	120

Chapter 9
Edit Audio on the Timeline 121

Adding and mixing your movie's sound

Add audio media clips to your timeline	122
Add Audio Only or Video Only from Project Media	122
Add a Fade In or Fade Out to an audio event clip	123
Basic audio event editing	123
Monitor your movie's audio levels	124
Adjust the Gain level for an audio event	124
Normalize a clip's Gain level	125
Adjust Volume or Pan for an entire audio track	126
Use Audio Envelopes to adjust audio levels at specific points	126
Interpolate audio keyframes	128
Edit or delete a keyframe or Audio Envelope	129
Adjust an audio track's Pan Audio Envelope	129
Adjust Pan for an entire audio track	129
Adjust Pan at specific points on your timeline	129
Edit your audio in an another program	130
Fill in a missing right or left audio channel	130
Record narration into your project	131
If your microphone isn't recognized...	131
Record alternate narration Takes	133
Pace your recording with the Metronome	134

Chapter 10
Preview Window Tools 135

Test driving your video

Adjust your Preview window's size and quality	136
Interlacing and Progressive Scan	138
Display the Safe Areas overlay	138

Project Properties	139
Grab a “snaphsot” of your video	140
Grab and paste your snapshot	140
Save your snapshot to a file	141
Play your video on an external monitor	142

Chapter 11

Add and Customize Your Titles 145

Putting text in your movie

Create a title using Generated Media	146
Customize a Generated Media title	146
Customize a title from	
a Legacy Plug-In template	147
Set a title’s length	148
Customize a title from a Text template	149
Customize a title from a Credit Roll template	151
Insert Text Media into your project’s timeline	153
Animate your title’s properties with keyframes	154
Edit a title event	156
Add effects to a title event	156
Save a custom look as a preset	157
Save a custom preset	157
Use special characters for a professional look	158
Apply a preset look	159
Delete a custom preset from the Preset library	159

Chapter 12

Add and Adjust Video Effects..... 161

Adding magic to your movies

Add an effect to your video	162
Event vs. Track vs. Media vs. Video Output FX	163
Apply an effect from the Video FX window	164
Select an effect from the Plug-In Chooser	165
Video Plug-Ins defined	166
Adjust a video effect	170
Multiply effects in a chain	171
Remove a video effect	172
Chroma key a background	172
Load additional VST effects into your program	175
Bypass or disable an effect	175
Pre-render your video effects	176

Chapter 13

Add and Adjust Audio Effects 179

Shaping your movie’s sound

Apply an audio effect	180
Add an effect to an audio clip on your timeline	180
Add an effect to an audio track	182
Add an effect to your entire movie’s audio	182
Audio FX defined	183
Adjust an audio effect	186
Remove an audio effect	187
Remove an effect from an audio event	187
Remove an effect from	
an audio track or master audio	187
Swap between alternative audio Takes	188

Chapter 14

Add and Customize Transitions 189

Smooth moves from clip to clip

Create a simple audio or video Cross-Fade	190
Convert a Cross-Fade to another transition	191
Interpolate your transition	191
Transition preferences	192
Add a video transition to your timeline	192
Add a transition from the plug-in library	193
Add a preset transition from	
the Transitions window	193
Transitions defined	194
Change the duration of a transition	196
Change the length of the overlap	196
Stretch the transition	196
How transitions work	197
Customize a transition	198
Save a custom transition preset	199
Add transitions to several events at once	200
Add transitions between selected clips	200
Automatically add	
Cross-Fades as you add your clips	201
Use an effect as a transition	202

Chapter 15
Create Animations with Keyframes203

Adding motion to your effects

Get to know keyframe and video animation basics	204
Get to know the Keyframe Controller	206
Create an animated Pan/Crop motion path	206
Interpolate your keyframes	209
Keyframe an effect animation	210
Create an animated transition	211
Keyframe a Generated Media animation	212
Create a Generated Media graphic animation	213
Create a Generated Media title animation	215
Keyframe Media Generators Credit Rolls	217
Use Video Envelopes to set levels at specific points	218
Lock your keyframes to your clips or your timeline	219

Chapter 16
Prep Your Movie for Output to DVD or BluRay Disc 221

Putting your movie on disc

Regions and other uses for Timeline Markers	222
Add and save Scene/Chapter Markers to your video project	223
Edit and remove your Markers	225
Understand non-square pixels	226
Output your video for a DVD or BluRay disc	226
The Muvipix.com Guide to DVD Architect Studio 5.0	227

Chapter 17
Make Your Movie229

Sharing your project with the world

Output your video to DVD or BluRay disc	230
File output options	231
Save your movie to your hard drive	232
Archive a high-quality version of your movie for later re-editing	232
Output finished video for use in a larger project	233
Output the Loop Region only	233
Save your movie in a format that's optimized for online viewing	234
Create an Image Sequence	234
Upload your video to YouTube	236

Save your video back to a miniDV or HDV camcorder	237
Output your video to a Sony PSP™	238
E-mail your video	239
Still more output options	241

Chapter 18
An Appendix.....243

Advanced Vegas Movie Studio HD tricks

Key program preferences	244
The Video tab	244
The Editing tab	244
Key project properties	245
Internal preferences	245
Set where your captured video is saved	246
For MiniDV video	246
HDV video	247
Maintain your Windows computer	247
Do this weekly	247
Do this monthly	248
Valuable free or low cost tools and utilities	249
Capture utilities	249
Our favorite free audio utility	249
FTP software	250
