Rip video files from your AVCHD camcorder or device 43

Capture video from a live Webcam, microphone or TV tuner 45

Rip video or audio from a CD, DVD or BluRay disc 45

Import video and audio already on your hard drive 46

Indicating 3D video 46

### Chapter 5

#### Edit on the Timeline .....47

##### *Turning clips into movies*

Media Room views 48

Filter your media views 48

Sort your media files 48

Change how your media files are displayed 49

Create media in the Media Room 49

Break a clip into scenes 50

Content Aware Editing 50

Trim a longer clip 51

Add media clips to the Timeline 52

Trim a clip on your timeline 52

Split a clip on your timeline 53

Delete clips from your timeline 54

Select, copy and paste clips 54

Insert one project into another 55

Add a Fade In or Fade Out 56

Remove audio or video from a clip 56

Function buttons 56

The Modify/PIP Designer function 57

The Fix/Enhance function 58

Power Tools 59

The Keyframe function 60

Select and output a Range of your timeline 61

Storyboard View 61

Working with 3D 62

Set your 3D Source Format 62

Preview window settings for your 3D footage 62

2D to 3D 63

Output your 3D video 64

### Chapter 6

#### Edit MultiCam Video .....65

##### *Cutting between camera angles*

Edit MultiCam video 66

Create a synced video collage with 100 track Multi-Cam Editing 69

### Chapter 7

#### Magic Tools .....73

##### *Easy ways to create cool movies and effects*

Magic Fix 74

Magic Cut 75

Magic Style 76

Magic Music 78

**Chapter 8**  
**Video Effects and Animations .....81**

*Optional text for your movie*

Create subtitles in PowerDirector	152
Import subtitles from a text file	154
Set your subtitles' behavior	155

**Output Your Finished Movie**

---

**Chapter 14**  
**Output a Video File..... 159**

*Sharing your movie*

Produce a video file	160
3D video outputs	161
Web video	162
Editable video for use in another project	162
Disc-ready video	163
Intelligent SVRT	163
Other video output options	164
Output your video for a device	164
Post your video to a Social Media site	165

**Chapter 15**  
**Disc Authoring..... 167**

*Creating DVDs and BluRay discs*

Timeline Markers	168
Add Chapters to your video	168
3D disc authoring	169
Create your disc menus	170
Content	171
Select a menu Template	172
Edit your menu's text	174
Add music and add a first play video	174
Navigate the disc's Menu Structure	176
Preview your menus	176
Create and modify templates in the Menu Designer	176
Design a Root Menu, Titles/Chapter Menu and Subtitle Menu	177
Text, objects and button highlights	177
The menu background and additional objects	178
Final tweaks	180
Save your template design	181

Save your DVDs and BluRay disc files to your hard drive	180
The 2D Disc and 3D Disc option panels	181
Burn a folder or ISO file to a disc	182

**Chapter 16**  
**An Appendix..... 185**

*More things worth knowing*

What's the difference between PowerDirector Deluxe, Ultra and Ultimate?	186
What is the DirectorZone?	186
How can I grab a freeze frame or take a snapshot of my video?	187
How can I speed up or slow down my video?	188
What are "shadow files?"	188
Where can I set my project to 5.1 surround sound rather than stereo?	189
What is 3D Depth?	189
What is Intelligent SVRT?	189
How can I add a time stamp to my videos?	190
What are Favorites?	190
What is the CyberLink Cloud?	191
How do I blur a face like on TV's COPS?	192
Need some Basic Training?	194
